

# TAHOE MODEL WORKS

## HO SCALE

### 50 TON DALMAN 2-LEVEL TRUCKS

*With Barber Lateral Motion Device*

*Our trucks feature one-piece black acetal plastic mouldings with separate brake shoe detail, and non-magnetic, insulated metal RP-25 contour wheelsets. Trucks are also available with "semi-scale" (.088" wide) wheels.*

Dalman 2-level trucks could also be equipped with the Barber Lateral Motion device. This feature used steel rollers and a roller seat between the springs and bolster to provide a little side-to-side movement of the car body to the track, reducing wear to wheel flanges, journals and couplers. Railroads using these trucks include ATSF, Canadian National, Canadian Pacific, Central of New Jersey, CB&Q, CNW, Illinois Central, MILW, Missouri Pacific (and subsidiaries I-GN and StLB&M), Northern Pacific, Rock Island and Southern Pacific.

**TMW-002** Dalman 2-Level Truck w/ Lateral Motion Detail, Frame only

**TMW-102** Dalman 2-Level Truck w/ Lateral Motion Detail, with wheelsets

**TMW-202** Dalman 2-Level Truck w/ Lateral Motion Detail, with "semi-scale" wheelsets
