

TAHOE MODEL WORKS

HO SCALE

USRA 50-Ton Andrews Trucks

This truck was manufactured for the United States Railroad Administration. In 1918, the USRA ordered 67,000 freight cars with this truck. These included 25,000 50-ton single-sheathed box cars, 20,000 50-ton composite drop-bottom gondola cars and 22,000 55-ton steel twin hopper cars. These cars were bought by 53 American railroads.

All our trucks feature one-piece black acetal plastic moldings with separate brake shoe detail, and non-magnetic, insulated metal RP-25 contour wheelsets. Trucks are also available with "semi-scale" (.088" wide) wheels.
